

Everybody's Doing It

The bank is universally used in the present age as a medium for conducting all business.

The young man starting up a peanut stand on the corner and the captain of industry conducting a large wholesale business both handle their business through the bank. All business that is done right is done through the bank, because it is the most efficient practical, economical and beneficial way. This bank is prepared to take care of the small business or the large business and each receives the same careful attention. We invite all to take advantage of our facilities.

USE GASOLINE TONIC

and Help Win the War

The war has made such an abnormal demand on the supply of gasoline that a shortage is threatened. The use of Gasoline and Distillate Tonic can increase the efficiency of gasoline so much that the present supply will do 25 per cent more work. Save the waste of gasoline as a patriotic duty as well as for the saving it will be to yourself.

Gasoline and Distillate Tonic

is a by-product of petroleum and hence contains no acids or other injurious substances that will injure metal with which it comes in contact. It acts directly upon the carbon in engines and eliminates all carbon trouble. The gasoline itself is made more efficient by causing the combustion to be instantaneous and complete. In short, Gasoline Tonic

Reduces Fuel Cost 25 to 50 per cent
Increases Mileage 15 to 40 per cent
Raises Power of Engine 20 to 40 per cent
Cuts Repairs on Engine 50 per cent

One quart treats 200 gallons of gasoline.

VEGETABLE MARMALADES

Less Expensive Than Those
Calling For Use of Fruit

Vegetable marmalades or jams are made less expensively than fruit marmalades, because a less proportion of sugar is used and because the vegetables may be procured more cheaply. The extension department of the United States Department of Agriculture, co-operating with state agricultural colleges in the North and West, presents several suggested recipes for vegetable marmalades or jams, to be used the same as fruit products. The ingredients for some of these are shown below. In each case the mixture should be cooked slowly until it is thick and the ingredients are tender, and then packed in hot jars and sterilized.

Tested Recipes

Carrot Marmalade—Two cups of ground carrot, 1½ cups of sugar, 2 sliced lemons, and 2 teaspoonfuls of ground ginger root.

Carrot and orange marmalade—Two cups of ground carrot, the juice of two lemons, the juice and grated rind of 1 orange, 1 cup sugar.

Carrot and pineapple marmalade—One cup of ground carrot, one cup of shredded pineapple, 1 cup of sugar, 1 sliced lemon.

Pumpkin and pineapple marmalade—One cup of pumpkin peeled and ground, 1 cup of shredded pineapple, 2 cups of sugar, 1 teaspoonful of ginger; this to stand over night in a granite pan or for several hours until the juice is extracted. Add the juice and rind of one lemon and cook as heretofore stated.

Ripe tomato marmalade—Twelve medium sized tomatoes peeled and thinly sliced, 1½ lemons sliced, 1¾ cups of sugar; to be placed in stew kettle in layers, cooked in covered vessel until tender, and then to simmer until the right consistency.

Green tomato marmalade—Two pounds of green tomatoes cut in cubes, 2 teaspoonfuls of bruised sugar root in cheese-cloth bag, two lumps of sugar, 2 sliced lemons.

Largest Under-water Cable For Telephone

One of the longest and largest telephone cables to be laid on the ocean bottom was completed this summer across Raritan Bay, between Eltingville, Staten Island, N. Y. and Keansburg, N. J., a distance of 5.5 miles. This completed an all-cable toll line 50 miles long between New York City and Spring Lake, N. J., and certain ocean counties. This line replaces 3,000 miles of open telephone conductors and removes 13,000 crossarms from poles. There are submarine telephone cables on the Pacific Coast and across the English Channel which are longer than the Raritan Bay cable, but they contain only from two to sixteen pairs of wires for transmitting telephone calls, as compared to the seventy-four pairs for calls and the twelve pairs of wires for testing purposes which are in the Raritan Bay cable.

Minister from Kansas

Reverend and Mrs. Parkinson, of the Kansas Conference, were in Williams Sunday. Rev. Parkinson preached at the M. E. Church both morning and evening. They left Monday morning for the Grand Canyon, and after a few days visit there will continue on the way to California.

Royal Baking Powder saves eggs in baking

In many recipes only half as many eggs are required, in some none at all, if an additional quantity of Royal Baking Powder is used, about a teaspoon, in place of each egg omitted.

Try the following recipes which also conserve white flour as urged by the government.

Corn Meal Griddle Cakes

1½ cups corn meal
1½ cups boiling water
1 cup milk
1 tablespoon shortening
1 tablespoon molasses
½ cup sugar
1 teaspoon salt
4 teaspoons Royal Baking Powder
NO EGGS

Scald corn meal in bowl with boiling water; add milk, melted shortening and molasses; add flour, salt and baking powder which have been sifted together; mix well. Bake on hot greased griddle until brown.

(The Old Method called for 2 eggs)

Eggless, Milkless, Butterless Cake

1 cup brown sugar
1½ cups water
1 cup seeded raisins
2 ounces citron, cut fine
½ cup shortening
8 teaspoons Royal Baking Powder

Boil sugar, water, fruit, shortening, salt and spices together in saucepan 3 minutes. When cool, add flour and baking powder which have been sifted together. Mix well; bake in loaf pan in moderate oven about 45 minutes.

(The Old Method [Fruit Cake] called for 2 eggs)

Send for our new booklet "55 Ways to Save Eggs." Mailed free on request.

Millions on Subways Daily

Approximately 1,500,000 persons ride on the New York subway system every day. One-half of this number is carried during rush hours, between 7 to 9 a. m. and 5 to 7 p. m. Until the new extensions now under construction are in operation, every rush hour train is being operated that tracks and station facilities will permit. At rush hours local trains are made up with six cars and express trains with ten cars run under one minute and forty-eight seconds headway. During the past ten years, it is said that the New York subway system has carried one and one-half times the world's population and during this period only one person has been killed in a train accident.

Electric Light for Soldiers

"Lights Out!" blow the bugles.

This is followed by no puffing and blowing to extinguish candles. An orderly in the camp subway merely throws a switch and every lamp in the camp goes out except the street lamps which are on another circuit.

Our training camps, with an army in the making, are lighted with electricity. In some cases the drill field is also illuminated. Where the camps are located away from any electric transmission line, and where it can not be reached by any central station service, a small gasoline engine-driven generating plant is installed. The camp "streets" are wired for street lights and the same poles carry the service wires from which the current is "tapped off" to light the barracks.

A typical installation is to be found at Camp Upton, situated on a government reservation comprising 16,000 acres, on the main line of the Long Island Railroad, between the villages of Yaphank and Manorville. When entirely completed the camp will have from 15 to 20 miles of well paved streets, a modern sewer system, a modern water works system and an electric light and power distribution system.

The streets will be well lighted by approximately 350 100-h. p., 6.6 amp. gas-filled tungsten lights. There are five pumping stations, two for the water-works system, aggregating 600 h. p. in capacity, and three for the sewage system, aggregating 135 h. p. The refrigerating plant is also operated by electric motors in capacity approximating 135 h. p. Several hundred horse power capacity of motors is also required for the laundry, hospital, other minor power purposes and for heating

MILO MAIZE

The following information regarding milo maize was given to an enquirer by Dr. R. H. Forbes, director of the agricultural experiment station of the university.

"With reference to milo maize I will say that this makes heavy demands upon the soil and must inevitably depreciate the yield of the crops that follow without an intervening green manuring crop of some kind. Under present conditions the harvesting of a smaller crop of very high priced grain would be warranted, the soil being restored by a summer growing green manuring crop such as cowpeas or beans. Corn undoubtedly is not so hard upon the soil as milo maize altho in general the same arguments apply to the following of corn with wheat.

"Probably the most popular corn in Arizona at the present time is Mexican June, especially the variety known at Sacaton Mexican June. Hickory King does well at the higher elevations, and in the northern part of the state, Papago sweet corn is proving to be especially desirable, and productive silage corn."

A built-in bathtub for your new home

The "Viceroy" built-in bath is one of the most beautiful enameled plumbing fixtures ever produced.

It is cast in one piece, and is exceptionally low in price, due to manufacturing economies.

This attractive tub is one of the latest examples of KOHLER trade-marked Enameled Plumbing Ware, which is notable for its high quality and the pure whiteness of the enamel.

Visit our show rooms today and see the "Viceroy," as well as the KOHLER lavatories and sinks we are exhibiting.

BAUMANN-HINDS CONSTRUCTION COMPANY

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 76c.

RECORD EGG LAYERS

The Poultry Department of the University of Arizona has a pen of White Leghorns, with an average egg production of 229.9 eggs per hen. The lowest record for an individual hen is 216 and the highest is 250. These are actual trapnest records taken during the 365 days following the laying of the first egg for each hen.

This pen of White Leghorns is a special breeding pen of ten hens that mated to a cockerel from a hen with a 275 egg record, and the University is expecting to build up a flock of high grade Leghorns from this pen. No stock will be for sale from this special mating before the spring and summer of 1918.

The foundation stock of this pen was secured from the Tancred White Leghorn Farm, Kent Washington.

North Carolina has made the hunting of game from flying machines illegal by prohibiting shooting waterfowl on any of the waters of the State from an airplane.
